

SMALL BUT MIGHTY

Introducing Glow-worm's
high-performance
Compact combi boiler

Glow-worm

Keeping Britain Glowing

Great things come in small packages

The Compact combi boiler is our most compact and lightweight boiler ever. But don't let its stature fool you – this boiler delivers big performance, and is sturdy and reliable for your peace of mind.

The Compact is available in both 24kW and 28kW outputs.

Features and benefits

User-friendly LCD display

Compact, smart design to suit modern homes

ErP A rated for efficiency - helping you to reduce your energy bills

Exceptionally quiet operating volume

Compatible with our full range of innovative controls

Keeping Britain glowing for over 85 years

Whether it's the hot shower after football training or toasty socks straight off the radiator, we provide that cosy glow that keeps everyone going.

Since 1934, we've been building robust, high-efficiency boilers, controls, and accessories that provide the families of Britain with the warmth and hot water they need. In 2001 we were acquired by the Vaillant Group, one of Europe's largest heating and hot water appliance manufacturers, enabling us to develop innovative new technologies, while keeping our roots at our state-of-the-art factory in Belper.

Trusted by families nationwide

Glow-worm is a name you can rely on. The high-quality build and performance of our products have earned us an 'Excellent' rating from our customers on Trust Pilot. Many of our boilers also come with Quiet Mark approval, meaning they've been tested and awarded for their low-noise operation.

Rated **Excellent** on Trustpilot

Compact Combi boiler

Our most compact and lightweight boiler ever. With a heavyweight performance our new lightweight combi range is sure to go the distance with landlords and first-time buyers.

Combi boiler

Suitable for:

1-4
people

1
bathroom

Small
spaces

A Combi boiler heats water and provides central heating in combination. Because it connects directly to the mains, heating water on demand, there's no need for a storage tank or a cylinder. This makes it nice and compact, so it's ideal for homes with fewer than two bathrooms or properties with limited space.

Dimensions

Height	Width	Depth
