

FOR A WARM WELCOME EVERY DAY

Introducing Glow-worm's highly
efficient and ultra-quiet Energy
boiler range

Glow•worm

Keeping Britain Glowing

Say hello to the Energy range

The Energy range has an attractive modern design with an easy-to-use interface and long-lasting performance. It's energy efficient and whisper quiet, so you can take that relaxing bath or unwind with your favourite book without being disturbed.

Features and benefits

Compact size fits in almost anywhere – including in the kitchen cupboard, out of sight

High efficiency which could mean lower fuel bills for you

Rear flue options make installation easier and quicker

Guaranteed for 10-years when installed with a Glow-worm Power System filter and registered through Club Energy

Ultra-quiet operation approved by Quiet Mark*

Compatible with our full range of innovative controls

*Excludes 35kW model

Keeping Britain glowing for over 85 years

Whether it's the hot shower after football training or toasty socks straight off the radiator, we provide that cosy glow that keeps everyone going.

Since 1934 we've been building efficient and robust boilers, controls, and accessories that provide the families of Britain with the warmth and hot water they need. In 2001 we were acquired by the Vaillant Group, one of Europe's largest heating and hot water appliance manufacturers, enabling us to develop innovative new technologies, while keeping our roots at our state-of-the-art factory in Belper, Derbyshire.

Trusted by families nationwide

Glow-worm is a name you can rely on. The high-quality build and performance of our products have earned us an 'Excellent' rating from our customers on Trust Pilot. Many of our boilers also come with Quiet Mark approval, meaning they've been tested and awarded for their low-noise operation.

Rated **Excellent** on  **Trustpilot**

An Energy boiler for everyone

Our Energy boiler range has something for every home. But it can be tricky to know which one to choose. So here's a brief introduction to each Energy boiler we offer, so you can find the perfect fit.

Combi boiler

Suitable for:

1-4
people

2
bathrooms

Small
spaces

A combi boiler heats water and provides central heating in combination. Because it connects directly to the mains, heating water on demand, there's no need for a storage tank or a cylinder. This makes it nice and compact, so it's ideal for homes with fewer than two bathrooms or properties with limited space.

Dimensions

Height	Width	Depth
700mm	390mm	280mm

System boiler

Suitable for:

2+
bathrooms

High-
demand
households

Unlike combi boilers, system boilers need a cylinder to store hot water. Fortunately, the system components are built into the boiler itself, so there's no need for a tank taking up valuable loft space. This boiler can provide hot water to multiple taps at the same time, making it perfect for homes with several bathrooms.

Dimensions

Height	Width	Depth
700mm	390mm	280mm

Regular boiler

Suitable for:

4+
people

2+
bathrooms

High-
demand
households

Low water
pressure
areas

A regular boiler is sometimes known as an open vent boiler and needs a cylinder and additional cold water tanks in the loft. This type of system is great when there is a higher demand for hot water and for larger properties with multiple bathrooms and showers. In addition this type of system can be great if there is low water pressure from the mains supply.

Dimensions

Height	Width	Depth
600mm	375mm	280mm

Why choose a Club Energy installer?

Club Energy is Glow-worm's installer loyalty programme. Choosing a Club Energy installer means you get a Gas Safe registered, independent expert who can offer you exclusive extended guarantees, as well as a free, no-obligation quote to ensure your Glow-worm products are the perfect fit for you and your home.
