# ecoTEC plus

## Combination, system and storage combination boiler range

 **Vaillant**

Extremely reliable with the in-built quality Vaillant is known for, the ecoTEC plus is clearly one of the best combination or system solutions available today.

With focus on efficiency and smart home integration, the ecoTEC plus has been designed to help you take control of your heating like never before, allowing you to precisely monitor your energy usage and reduce your energy bills.

Available in a range of power outputs, the ecoTEC plus has been remastered to create a stylish, modern and extremely efficient boiler, perfect for any home.

## The new ecoTEC plus at a glance

### Smart-home ready

App connectivity and smart-home integration helps you control your heating whilst monitoring and managing your energy usage with ease.

### Stylish design

The new ecoTEC plus offers a sleek, modern and stylish design that fits seamlessly into any home.

### Guarantee available

10-year guarantee available when installed and registered with a Vaillant Boiler Protection Kit of your choice by a Vaillant Advance installer.

### A boiler for now, and the future

The ecoTEC plus is hydrogen prepared - tested and validated to work safely and can work efficiently with up to 20% hydrogen mix. The perfect home heating solution for years to come.

### Quality products

German engineering and British manufacture. Hand-built in our award-winning manufacturing plant in Belper, Derbyshire using premium quality components and materials.

### Long-lasting quality, efficiency and performance

Sharpened intelligence with our IoniDetect technology helps to achieve even greater efficiencies, lower gas consumption and less wear and tear.

### Quiet mark accredited\*

Quiet and peaceful operation for your home.

\*Excludes the ecoTEC plus 635

# Unlock the full potential of a Smart Home Ready boiler

The new ecoTEC plus integrates seamlessly into a smart home, enabling complete control of your heating via Amazon Alexa and Apple HomeKit and our easy-to-use myVAILLANT app.

What's more, with myVAILLANT connect smart home subscriptions, it unlocks a whole new level of remote appliance care, support, and energy optimisation, for increased efficiency, first-class customer service and even more peace of mind.

To find out more about energy optimisation and remote appliance care packages, visit [vaillant.co.uk](http://vaillant.co.uk)

## Take control from anywhere

The **myVAILLANT app** allows you to control your heating and hot water from anytime, from anywhere.

Works with  
**Apple Home**

# Choose the right controls for you

Vaillant controls speak a dedicated language - one that lets them do more than turn a boiler on and off. It enables constant precision control, so there's no wastage, more power, increased efficiency with the potential to lower your energy bills.

## myVAILLANT connect gateway

The **myVAILLANT** connect internet gateway is our new plug-and-play solution that enables seamless smart home integration of your heating appliances when fitted with one of Vaillant's senso range of controls.

## sensoROOM

**sensoROOM** is our easy-to-use digital thermostat. When installed as part of a Vaillant heating system, the control will take advantage of enhanced load compensation to modulate the Vaillant heating system. The myVAILLANT connect acts as the receiver for the sensoROOM which allows use of the myVAILLANT app and can use the internet to offer weather compensation.

## sensoHOME

Our senso range of controls is designed with simplicity in mind. When paired with the myVAILLANT connect internet gateway, the **sensoHOME** offers an elegant and modern smart control solution, complete with an intuitive interface, app connectivity and smart-home integration.

Scan the QR code to find out more about Vaillant's intelligent range of controls and learn how choosing the right control can not only increase your comfort levels, but help you reduce your energy consumption and bills, too.
